DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 25-28, 41-44 and 50-52, drawn to a transmitting and receiving system comprising a transmitting apparatus and a receiving apparatus, classified in class 455, subclass 70.
 - II. Claims 2, 4 and 22, drawn to a transmitting apparatus, classified in class 455, subclass 92.
 - III. Claims 3, 19-21, 23, 24, 40 and 45-48, drawn to a receiving apparatus, classified in class 455, subclass 130.
 - IV. Claims 5 and 6, drawn to a storage method and a readable recording medium, classified in class 707, subclass 1.
 - V. Claims 7-18, drawn to a management apparatus for use in a transmitting and receiving system, classified in class 455, subclass 414.3.
 - VI. Claims 29-39 and 49, drawn to a broadcasting apparatus, classified in class 455, subclass 3.01.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-VI are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the

subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as in invention I including a transmitting and receiving system comprising a transmitting apparatus and a receiving apparatus. The subcombination has separate utility such as a transmitting apparatus as in invention II, a receiving apparatus as in invention III, a storage method and a readable recording medium as invention IV, a management apparatus for use in a transmitting and receiving system as in invention V, and a broadcasting apparatus as in invention VI.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, nor Group III, nor Group IV, nor Group V, nor Group VI, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

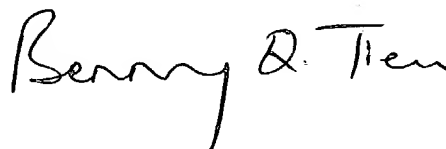

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
